Jennifer
 Was just writing you an email on this.

Thanks

Rob,

During our meeting at HDR's office last month, John Kern mentioned that he would
provide his MATLAB files for fitting the variograms, including nugget effect. The zip file
has been uploaded to SharePoint. The zip file also includes html and pdf output files as well
as excel spreadsheets with the pairs used to directly calculate the nugget effect. I have also
attached an instruction sheet to replicate the analysis.

Please let us know if you have any questions or need any help with this.

Thanks,

Jennifer LaPoma
